Progress Report November 03

Work began on the construction of the Palm Oil/Cassava Processing unit on November 12th with more clearing, pegging out and initial foundation work. The first blocks were moulded the following day. The building will be completed, and the machinery installed in time for the main Palm Fruit crop in mid December.

First site visit before work commenced

Training will commence in the Skills Centre on January 5th. The Canadian instructor, Derry O'Byrne, is organising courses. The first courses will be Tailoring and Fabric Arts, taught by a local instructor, followed closely by the Woodcraft programme. Other courses will follow as and when we gain the necessary funds.

Checking first batch of blocks,
November 14th
